## Eco Tour to Mui Wo, Lantau Island

With the support by Local Co-curricular Activity Fund (UOWCHK), Faculty of Science and Technology had organized an eco tour to Mui Wo, Lantau Island on 1 October 2022. 60 students from CGE13215 Nature and Conservation course joined this activity. This tour was led by 5 eco tour guides and Judy KIU. There were several spots where the students would learn biological and cultural issues, including the river ecology and waterbirds, Yuen's watch tower (a historic building), Man Mo Temple, Paper Bark trees and their importance, cattle herd and its history, and so on. Students learnt through observation and touch sensation.

Apart from that, students installed a mobile app – iNaturalist, such that they could take photographs of animals and plants they encountered during the tour. Locations and time of observation would be recorded in the APP. The mobile APP is connected with worldwide animals and plants lovers who will give students comments on the identification of species. And as a teacher can also suggests the species names to the students. As a result, students can learn fauna and flora in an interactive and fun way.
