## **Academic Improvement Scholarship**

### **CHEUNG HOI SHAN**

Associate of Science in Environmental Studies

There is no question that Hoi Shan's GPAs in this College have always been in the high range. The reason for winning this scholarship is that she has pulled her GPA from good to excellent, reaching a Semester GPA of 4.15 in the latest. The teacher commented that she has high self-initiatives, passion for the subject and a sensible mind, making useful contributions to class discussions. Hoi Shan herself also shared with us that her secret of success was "deep involvement". "If you want to be good at doing something, you need to immerse yourself into it." To enhance her knowledge of environmental studies, Hoi Shan has joined a lot of relevant extra-curricular activities. She is an Organic Ambassador in the Organic Resource Centre and a volunteer worker for the WWF Walk for Nature. Indeed, she has put her words into practice.
