Effective search: Filters & Boolean operators

Advanced search

Search help

Exact match supported for author search results

You can perform an exact author search by enclosing the name (first and/or last) of the author in quotation marks.

Boolean operators

The Boolean operators AND, OR, and NOT can be applied to search terms.

AND (also + or &)

Use AND to search for documents containing two or more terms. For example, the following query returns documents containing both cat and dog:

cat AND dog

The AND operator is applied by default; for example cat AND dog produces the same results as cat dog.

OR

Use OR to search for documents containing at least one of two or more terms. For example, the following query returns documents containing cat, documents containing dog, and documents containing cat and dog:

cat OR dog

NOT

Use NOT to search for documents that do not contain a given term. For example, the following query returns documents containing cat but not containing dog:

cat NOT dog

Supporting resources: CiteMachine

1. Online citation generator
2. Use Website address and DOI

The screenshot displays the CiteMachine citation generator interface. On the left, a red box highlights the DOI <https://doi.org/10.1080/23311908.2019.1655981>. A red arrow points from this box to the search input field on the right. The search input field contains the same DOI. Below the search field, there are links for "Create manual citation" and "What is a DOI?". The search results section shows "1 result found" for the article "Time management skills in relation to general self-efficacy and parental sense of competence in individuals with and without cognitive disabilities" by Afsaneh et al. - Cogent Psychology - 2019.
