### Field Trip - West End Public Cargo Handling Area

Student A responded: Although it is a hot day, sweating like rain, it does not hinder our original intention of field exploration. Gratitude to the arrangement by Professor.

Student B's reflection: As a supply chain management year 4 student, this site visit is so exciting and important to learn how it works in real life. I saw the oil come from Europe to Hong Kong and we were told it is going to distribute to local Hong Kong. I saw so many construction materials from mainland China to Hong Kong and coconuts from Thailand to Macau via Hong Kong. We got a chance to see how they ship the materials and how they keep and maintain materials in the port itself for a while. It is a very useful trip for us to visit.
